

# How to apply for the Charge Ahead Colorado Grant

- 1 Review the Charge Ahead Colorado page on the Colorado Energy Office's website and read through the application guide: <https://energyoffice.colorado.gov/charge-ahead-colorado>.
- 2 Identify your ReCharge Coach and if you are a qualifying entity, reach out for assistance.
- 3 Work with your utility company to choose a location and type of charger to fit your facilities' needs. DCC Regional Coordinators can facilitate introductions to utilities.
- 4 Connect with DCC for assistance in planning a site assessment to ensure your location is properly set up for increased energy load and install of a charging station(s).
- 5 Contact your city/county for information on permitting fees. You are advised to not purchase a permit before being granted the award. DCC can facilitate introductions to local permitting experts.
- 6 Gather quotes from 2–3 charging vendors. Visit DCC's [Charging & Infrastructure Partners](#) webpage for a list of vetted vendors to get you started.
- 7 For workplaces or HOAs, work with DCC to complete an employee/resident survey to demonstrate demand for charging stations.
- 8 Begin your application in a Word document.
